KURT steers the TIGER MOTH towards the dimension gate with ZORELL and PHILLIP on the port side and BELLAMY and BRUNSTAN on the starboard side manually pulling levers to angle solar sails, catching light and heat radiation from solar winds .

The TIGER MOTH is based on a primitive Solar Yachts used by early Pioneers to cross star systems. It's shaped like a large torpedo with solar panels attached to the hull .
Solar yachts usually have antique oak paneling brass railings around banisters and fitted sofas leading to a shelving units kitchenette and bedrooms.
KURT uses an INTERCOM next to the big wheel to activate a DIMENSION GATE one of the twin 10 meter arches rotating 40 degrees creating a mercury pool at its Centre and steers the TIGER MOTH through and it comes out of the 10 meter arcs near the Hyperion shopping center
KURT WILLIAMS can you weigh the Anchor for me .
From quadraphonic speakers the synthesized ambidextrous voice of MONITOR .

tiger MOTH I have you on positive track

The TIGER MOTH glides towards HYPERION SERVICE CENTRE which combines a shopping center at its hub with modules for garages , hotel accommodation and tropical gardens .
TheTIGER MOTH Aligns itself with one of the outer hatches and ejects an umbilical cord which locks on to the outer hull and inflates to create a tunnel for the crew to walk through. They walk through the umbilical tunnel and out into reception area to a cheering crowd .

GENERAL WILLIAMS Just a quick stop over here and then it's on to Arcadia .
VANESSA BELLAMY The news agency will have a couple of shots of us and then they will launch into a long commercial.
From quadraphonic speakers mounting above doors the

synthesized ambidextrous voice of monitor [central computer] is replaced by VEGA 6 News report special .

Kurt leaves the family picnic area past the landscape stone garden with water fountain, seeing Montague Bunter And TONY through the airlock door to reception .
Phillip and Branston are waiting near the airlock .
BRUNSTAN I've recharged the batteries and ZORELL gave me a huge shopping list for some of that holistic medicine and vegetable protein .
KURT No eggs in bacon I could murder a fry up
When they're all assembled at reception they walk through to a departures lounge and through umbilical tunnel Into the cabin with its old oak fixtures and fittings in brass railings and take their places .

The TIGER MOTH glides smoothly into the swirling maelstrom and immediately the crew are buffeted by slipstreams and have to hang on to the brass railings .

The TIGER MOTH is ejected from the dimension Gate halfway into the Remus star system and sets sail for the third planet no known as Arcadia . KURT plots a straight path towards ARCADIA the solar yaght using the heat and light radiation to steer the TIGER MOTH past the fourth planet . WILLIAMS and BELLAMY on the port side and ZORELL and PHILLIP on the starboard side manually adjusting levers connected to the solar cells on the outside of the hull .

From speakers mounted into discrete places throughout the lounge the ambidextrous voice of monitor [central computer] can be heard saying:-

Tiger Moth I have you on positive track tuning tuning to this homing signal

They can hear a regular pulse from the quadraphonic speakers as the tiger Moth nears the ROMULUS SERVICE STATION where other craft fill up with rocket fuel and get general supplies . It glides alongside ROMULUS and BRUNSTAN fires an umbilical cord that connects with the outer hull and inflates to let the crew walk over to ROMULUS service center and landscape garden.

They walk past the brightly lit reception and down the main gantry with soft lighting hexagonal resin panels and charcoal gray tiled carpet enter a large cabinet and strap in and start the journey down onto the surface of ARCADIA .
The elevator goes from high altitude through perspex tube And the view changes from dark blue to sky blue ,REACHING MAXIMUM ACCELERATION of 60 mph IN 60 SECS through another cloud bank for a controlled landing at ground level .
